

For basic support, please read this document. If your concern has not been addressed, please contact us. A valid sales receipt is required for all technical support inquiries.

REQUIREMENTS

Presently all products require the full version of Native Instruments Kontakt. Our products do not include a Player/Engine/VSTi. Any Player/Engine/VSTi you may own from another product cannot be used. This includes the free Kontakt player or demo modes. Native Instruments Kontakt 4/5/6.

INSTALL

1. Download and unzip the main .rar to your desktop.
2. Within the main folder, you may see sub folders in 2 parts.
3. Part 01 is always audio data.
4. Part 02 is always the nki files (s) and misc.
5. Double click on any nki file to launch Kontakt.
6. Should Kontakt ask for audio samples, point to part 01.
7. After the instrument is loaded, save it within Kontakt.

NO SOUND ON LAUNCH

All products using the VT Script require you to first select an element.

1. Open a nki. file within Kontakt and click on the “Elements” or “Empty” tab.
2. Scroll via the drop-down menu to select an item. Once selected, it will appear in the VT window and it can now be heard via MIDI trigger.

PRODUCT UPDATES

This area is for those who have opted to sign-up to our company newsletter. To gain access, please sign-up. Subscribers have access to Kontakt demos, free files, announcements and special discounts. All product updates are hosted in this section. Please sign in to the Subscriber section to learn more and download the updates.
